

I brought Dine Rite 3 years ago with my partner. The quality of the Dine Rite cooking set is still like new. We haven't even had to sharpen the knife set and it is all still sharp and cuts through food easily. At the age of 21 I was heading on a clown wood spiral with my health I was 80kg's had Diabetes & High Blood pressure 250 over 160 Heart attack Range and on medication. After getting married in 2009 & trying to start a family but finding it hard with my failing health. I began using my Dine Rite cookware set again along with a weight loss program I have got my Diabetes & Blood Pressure under control & off medication. I have also lose 8.7 kg in the last 3 months.

I owe it all to my weight loss program & Dine Rite cookware set. Being able to prepare wholesome meal with all the good vitamin & flavors still in the food as long with cutting out all the Add fats. & in half the time just put all the ingredients in the cookware. turn on low and in no time healthy food the whole family will enjoy. Thank you Dine Rite cookware.
